Introduction to Python

autoři David Baez-Lopez, David Alfredo Baez Villegas

v měkké vazbě, 436 stran

vyd. Taylor & Francis Ltd, VII/2024

ISBN 9781032119106

běžná cena: 1.750 Kč

v této nabídce: **1.200 Kč**

(tato cena platí při objednání titulu do 30. 9. 2024)

Description

Introduction to Python: with Applications in Optimization, Image and Video Processing, and Machine Learning is intended primarily for advanced undergraduate and graduate students in quantitative sciences such as mathematics, computer science, and engineering. In addition to this, the book is written in such a way that it can also serve as a self-contained handbook for professionals working in quantitative fields including finance, IT, and many other industries where programming is a useful or essential tool. The book is written to be accessible and useful to those with no prior experience of Python, but those who are somewhat more adept will also benefit from the more advanced material that comes later in the book.

Features
Covers introductory and advanced material. Advanced material includes lists, dictionaries, tuples, arrays, plotting using Matplotlib, object-oriented programming
Suitable as a textbook for advanced undergraduates or postgraduates, or as a reference for researchers and professionals
Solutions manual, code, and additional examples are available for download
